

CONTROL TRANSFORMER

Q-LOG make control transformers are designed to sustain high surge inputs. We manufacture & supply a wide range of control transformers which are fabricated from superior quality raw materials. All control transformers like PCB mounting, Flying leads, & special clamping system are also available as per customers requirement. These control transformers are basically use for electronic equipments and control panels.

Q-Log supplies following control transformers.

- Control transformer PCB mounting type
- Step down
- Step up
- Three phase and single phase
- Power rating from 1VA to 5000VA
- Auto-transformers
