

POWER TRANSFORMER

Q-Log Controls, manufacture & supply a wide range of power control transformers which are fabricated from superior quality of raw materials. These products are appreciated for their durability, comfort, reliability and specific features like performance, latest technology, and compact design. These transformers are available in various versions like single phase / three phase isolation transformers & auto transformers packed with latest features like

- All units are 1 phase / 3 phase 50/60 Hz
- All units are designed to operate at 55°c rise, 105°c insulation to maintain heat.
- Terminal blocks covered with sheet of protection / closed terminal blocks

Product Picture:

Optional features

- Enclosures floor mounted
- Multi tap primary voltages / secondary voltages
- Flexible leads, fuse holders, screw less terminal blocks, brass studs.
- Insulation Class F

Q-Log supplies following power transformers.

- Step down
- Step up
- Three phase and single phase
- Power rating from 5KVA to 25KVA
