

CURRENT TRANSFORMERS

GAN PRODUCTS CTs are designed to minimize the errors using the best quality electrical steels for the core of the transformer. Both toroidal (round) & rectangular CTs are manufactured. Our current transformers (CTs) can be used for metric & imperial size busbars.

These are normally available for system voltage 660 v, 50/60 Hz from 1.5 VA to 30 VA burden upto 3000 / 5 amps ratio. These CTs are confirms to IS 2705-1964.

Q-Log supplies following current transformers

- Power range 1.5VA to 30VA
- Current ratio 3000:5
